

NTT received an award for the Thomson Reuters 2011 Top 100 Global Innovator program

Nippon Telegraph and Telephone Corporation (NTT, Tokyo) received an award for the Thomson Reuters 2011 Top 100 Global Innovator program. This program launched by Thomson Reuters (New York) is an initiative that analyzes patent data and related metrics in a proprietary methodology to identify the companies and institutions that lead the world in innovation activity.

NTT understands this award certifies that R&D activities of NTT Laboratories are pioneering and inventions are valuable in a global market. NTT will make every effort to promote obtaining patents based on the outputs of R&D activities as well as to make the most use of our owning intellectual properties.

Mr. Haruhiko Kojima (left-side), Managing Director, NTT Intellectual Property Center, is receiving a trophy from Mr. Masaki Nagao (right-side), Managing Director, Thomson Reuters Professional KK, a Thomson Reuters Company.
